

Bayanatz — 10 fixes, before and after

Ten of the visible bugs from the QA report of 06 Oct 2026. Left: the tester's screenshot. Right: how the same screen looks with the new code, and below it how it was solved.

Note: the “after” pictures are drawn illustrations made from the new code (texts, colours and layout taken from it). They are not screenshots, because the app has not been built yet. After `flutter build web` and deploy, take real screenshots of the same screens to confirm.

BUG-116	Apply form keeps 2 columns on a phone	Public site · Apply (390 px)	page 2
BUG-114	Phone shown as “+2000000000000”	Admin · Applications	page 3
BUG-111	Salary shown without currency	Public site · Job page	page 4
BUG-125	No message when there are no open jobs	Public site · Careers / Jobs	page 5
BUG-128	Required fields not marked	Public site · Contact Us	page 6
BUG-152	“New” and “Closed” use the same red	Admin · Inquiries	page 7
BUG-159	Application card title shows the department	Admin · Applications	page 8
BUG-108	Mobile footer shows only a “Vision” link	Public site · Footer (mobile)	page 9
BUG-109	Unknown job link shows bare “Job not found” text	Public site · /jobs/<unknown>	page 10
BUG-147	Arabic Apply shows the country code as “20+”	Public site · Apply (Arabic)	page 11

↔ 16 px side margins · one field per row

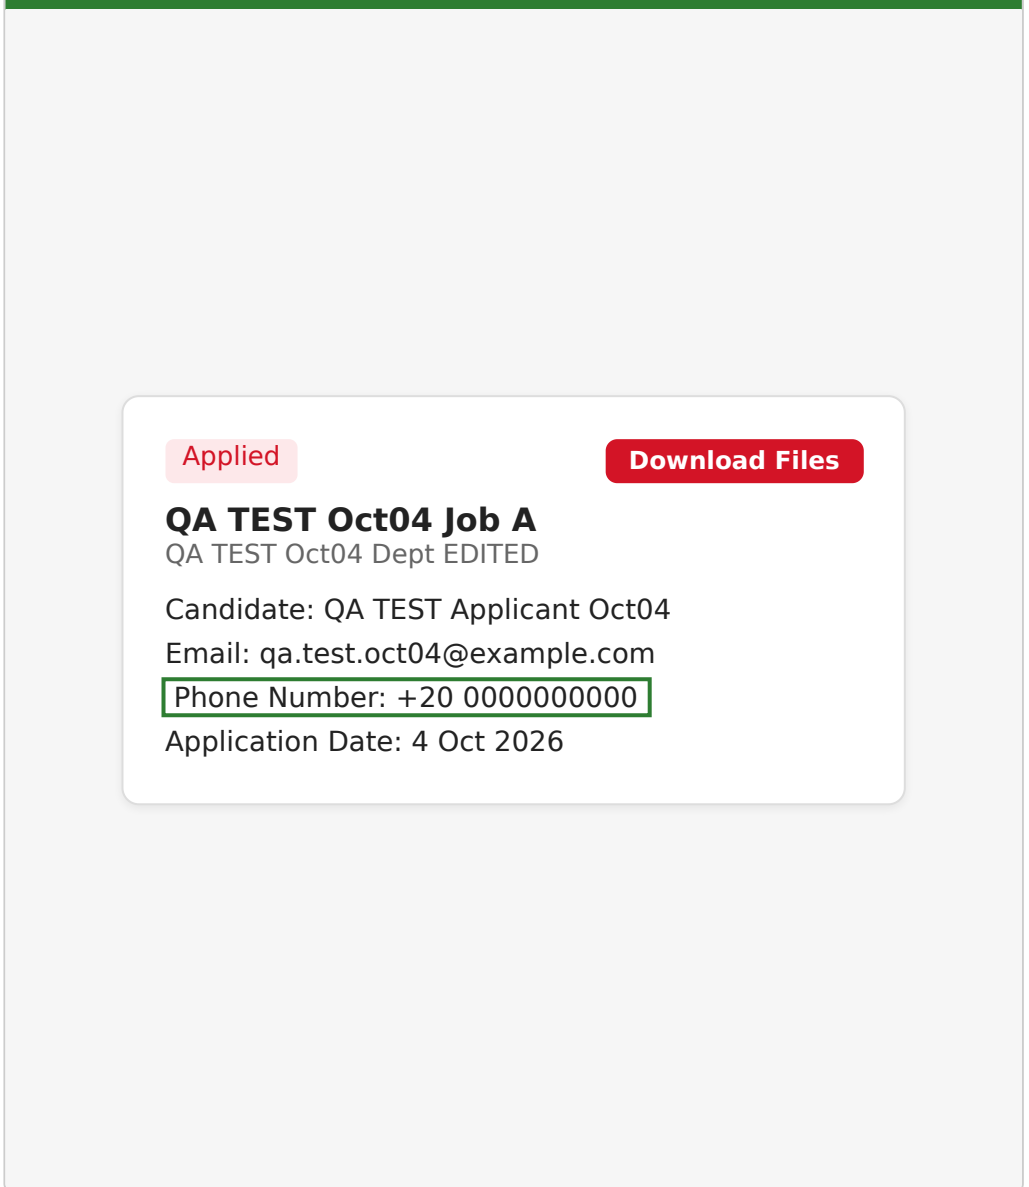

How it was solved: Under 600 px wide the form now puts one field per row (it used two columns at every width). The Jobs, Job and Apply pages also got 16 px side margins, so titles no longer touch the screen edge (BUG-134). The phone box is the same 36 px height as the other fields.

BEFORE — QA screenshot (report 06 Oct)

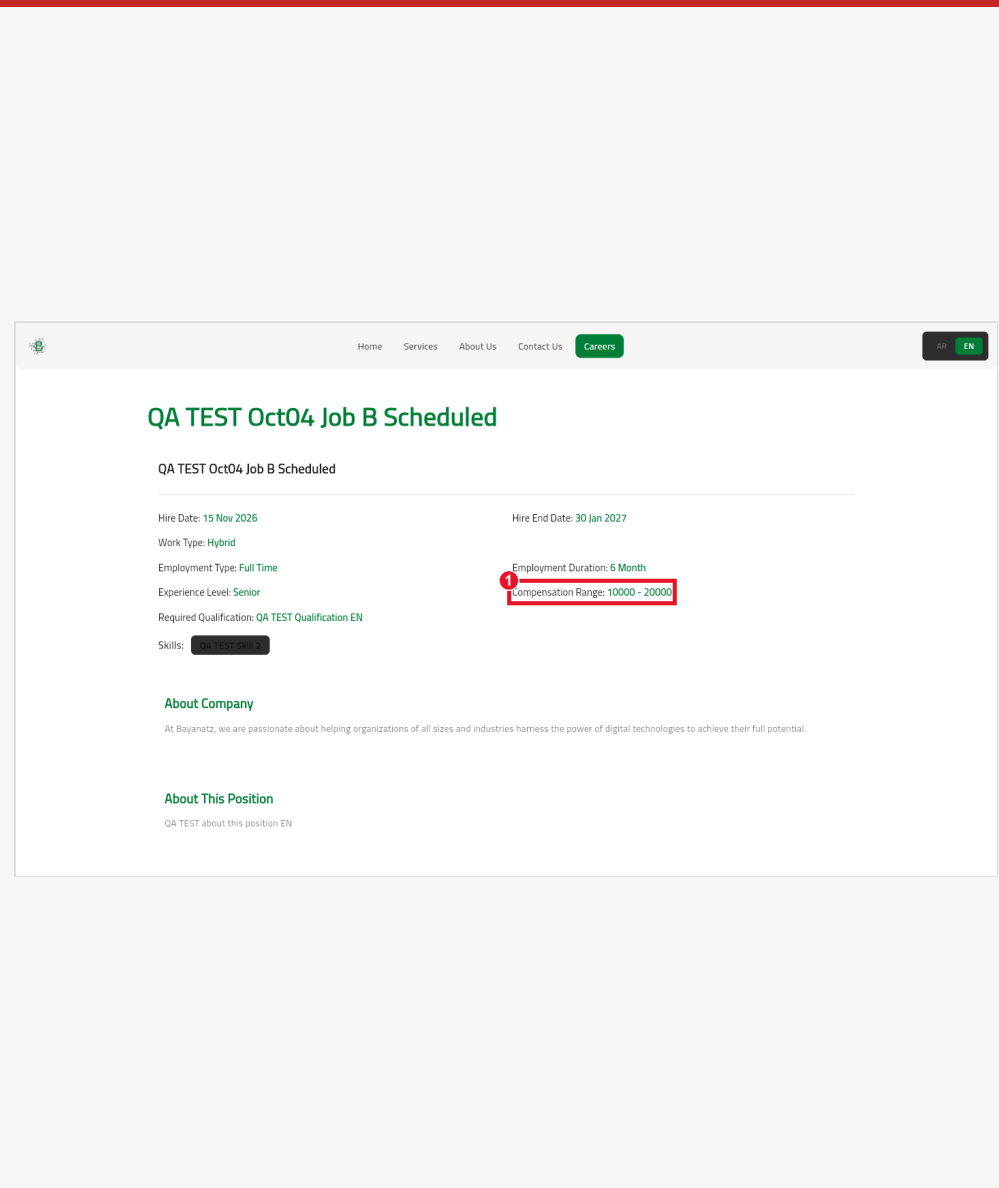

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

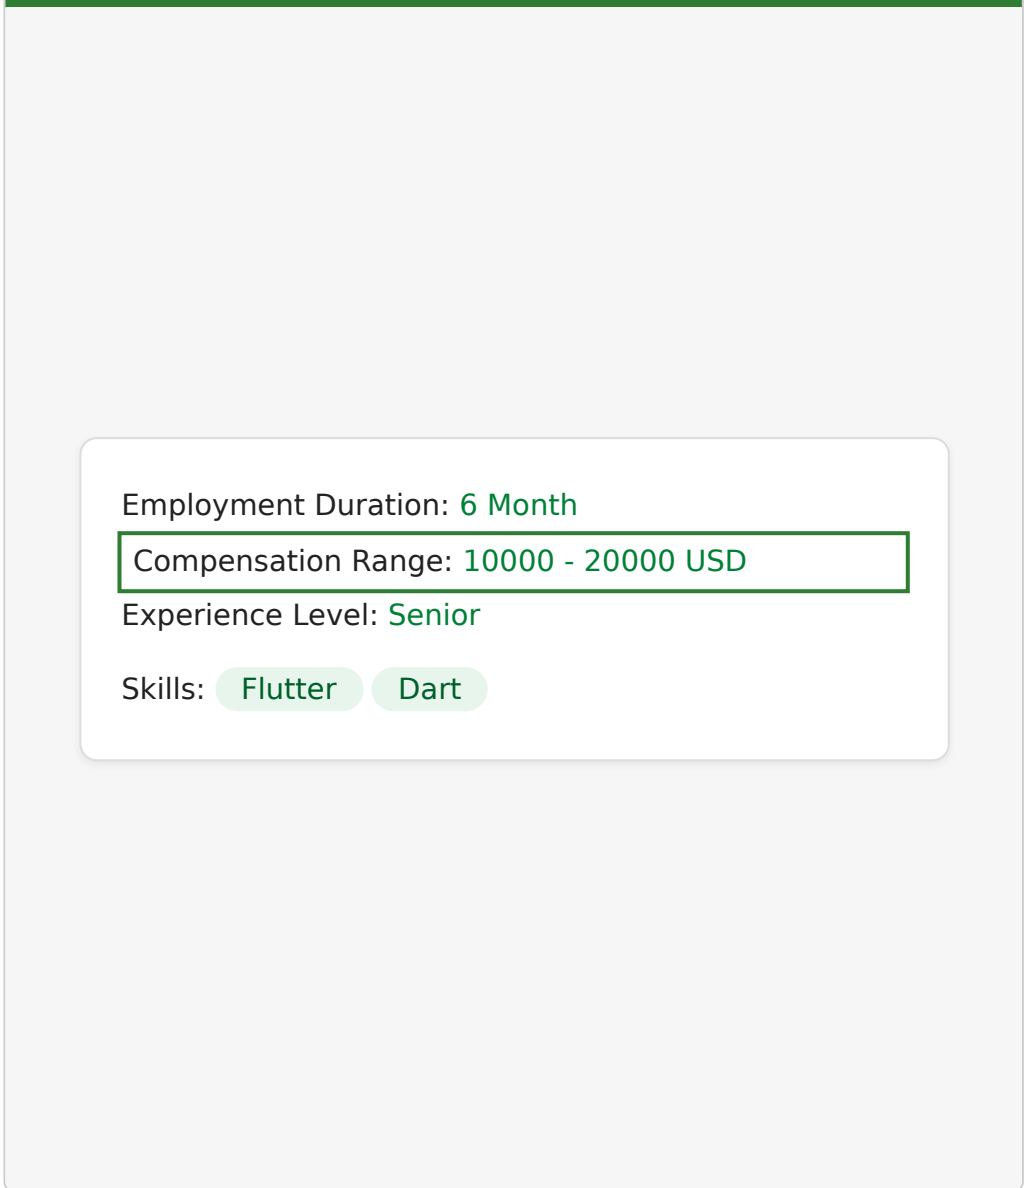

How it was solved: The country code and the number were glued together. Cards and the list now show the code, a space, then the number (“+20 0000000000”). Dates use the same “4 Oct 2026” format everywhere (BUG-145).

BEFORE — QA screenshot (report 06 Oct)

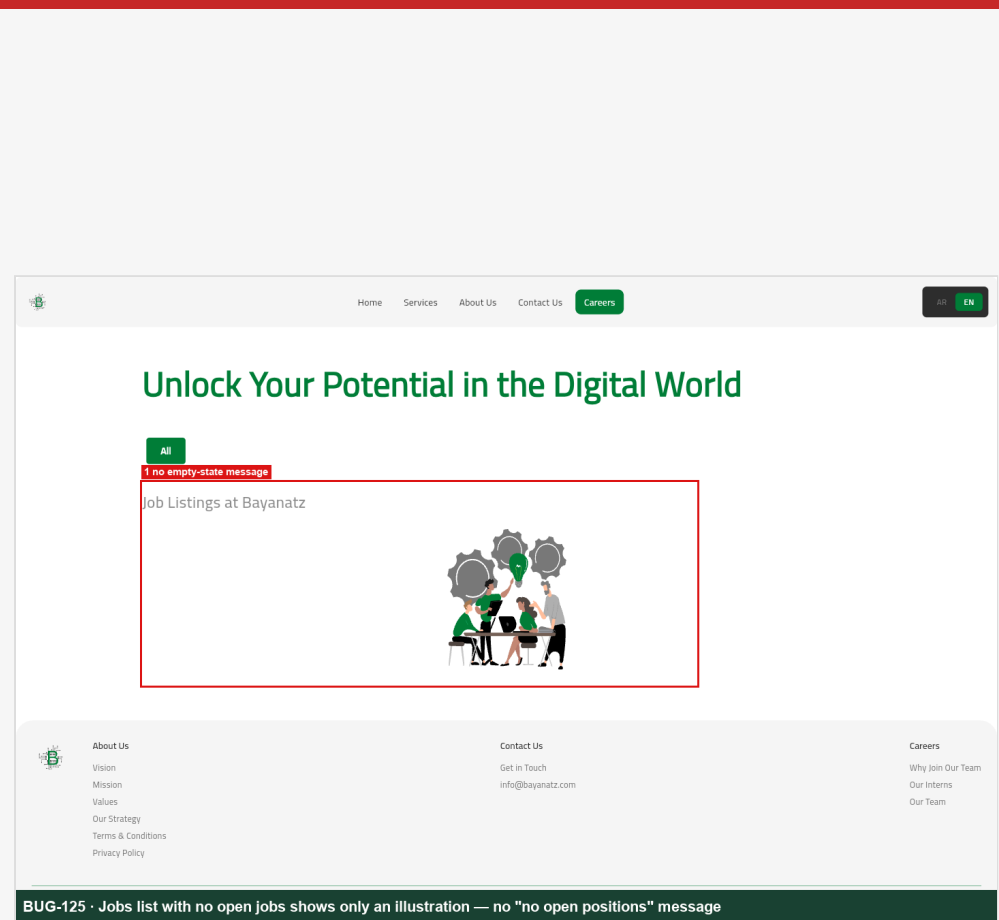

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

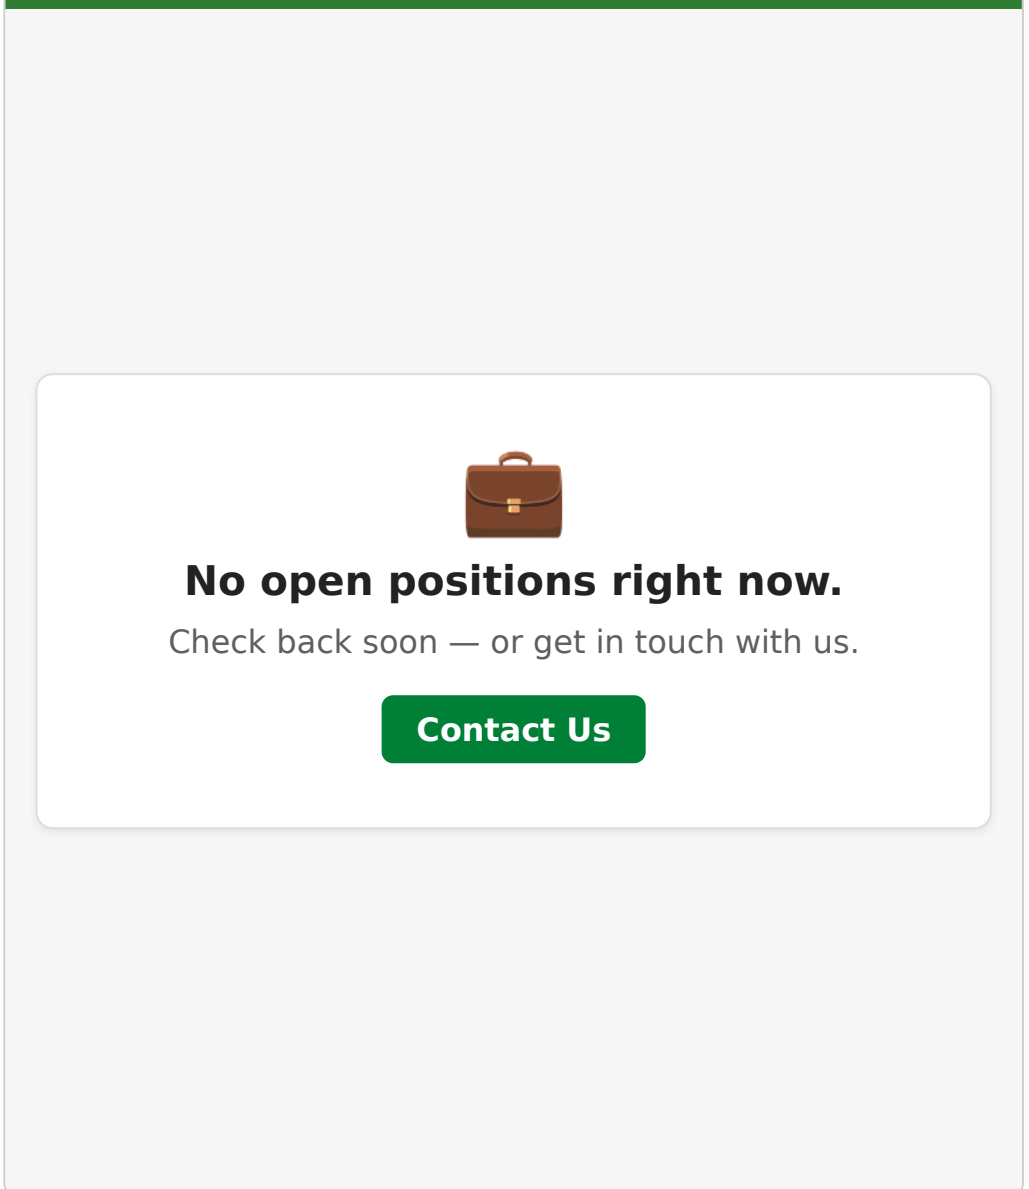

How it was solved: The salary range now shows the job's currency after the numbers (e.g. "10000 - 20000 USD"), on the job page and in the Apply summary. The skill chips also got a light style so they are readable (BUG-113).

Files: website_app · job_detail_page.dart, job_apply_page.dart

BEFORE — QA screenshot (report 06 Oct)

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

How it was solved: When no job is open, the list shows a clear message, “No open positions right now.”, with a “Check back soon” line and a Contact Us button (in Arabic on the Arabic site). Before, it showed only the picture, so it looked broken.

How it was solved: Required fields now have a red * next to the label, and optional ones say “(Optional)”, so visitors know before pressing Send. The “Text Here” placeholders were replaced with real hints (BUG-129), and the button now says “Send” instead of “SEND” (BUG-146).

BEFORE — QA screenshot (report 06 Oct)

BUG-152 · "New" and "Closed" counters use almost the same red (#D31426 vs #E53935)

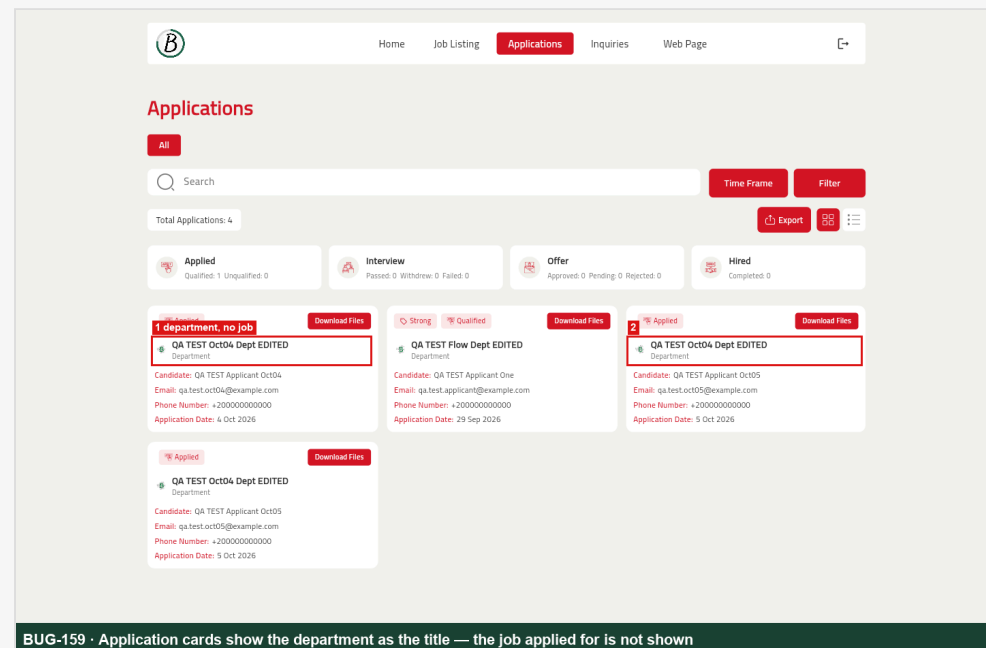

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

How it was solved: "Closed" is now dark grey (#616161) instead of #E53935, which was almost the same red as "New". The status badges in the list use the same colours. The first counter was also renamed "Total Submissions" (BUG-157).

BEFORE — QA screenshot (report 06 Oct)

BUG-159 · Application cards show the department as the title — the job applied for is not shown

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

Applied

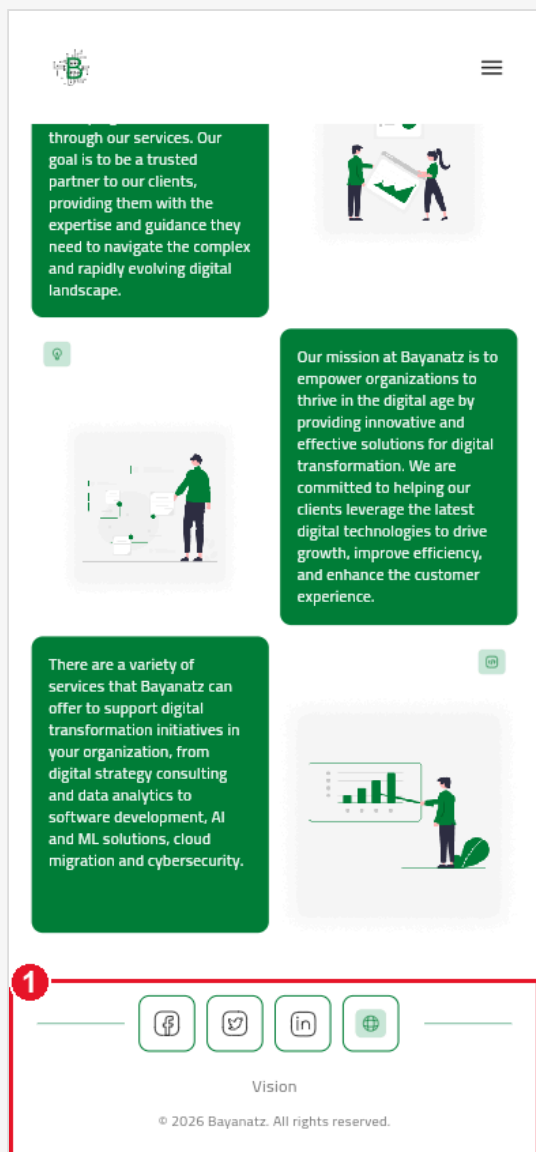

QA TEST Oct04 Job A
QA TEST Oct04 Dept EDITED

Candidate: QA TEST Applicant Oct04
Phone Number: +20 0000000000
Application Date: 4 Oct 2026

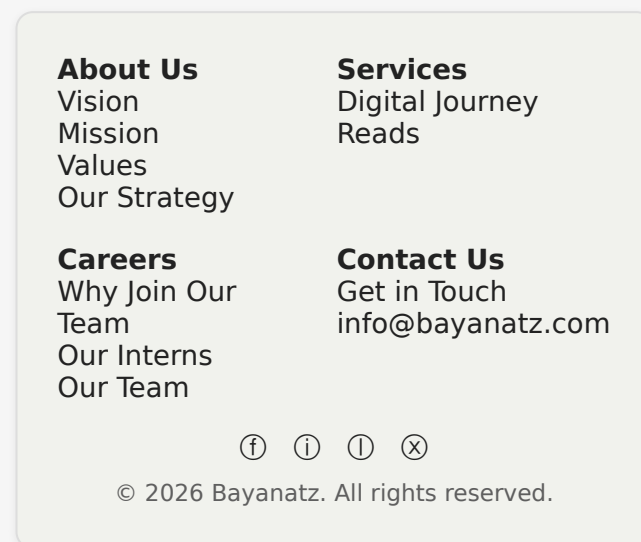

How it was solved: The card heading is now the job the person applied for, with the department in small text underneath. Before, it showed only the department, so you couldn't tell which job an application was for.

Files: web_app_admin · app_card.dart

BEFORE — QA screenshot (report 06 Oct)

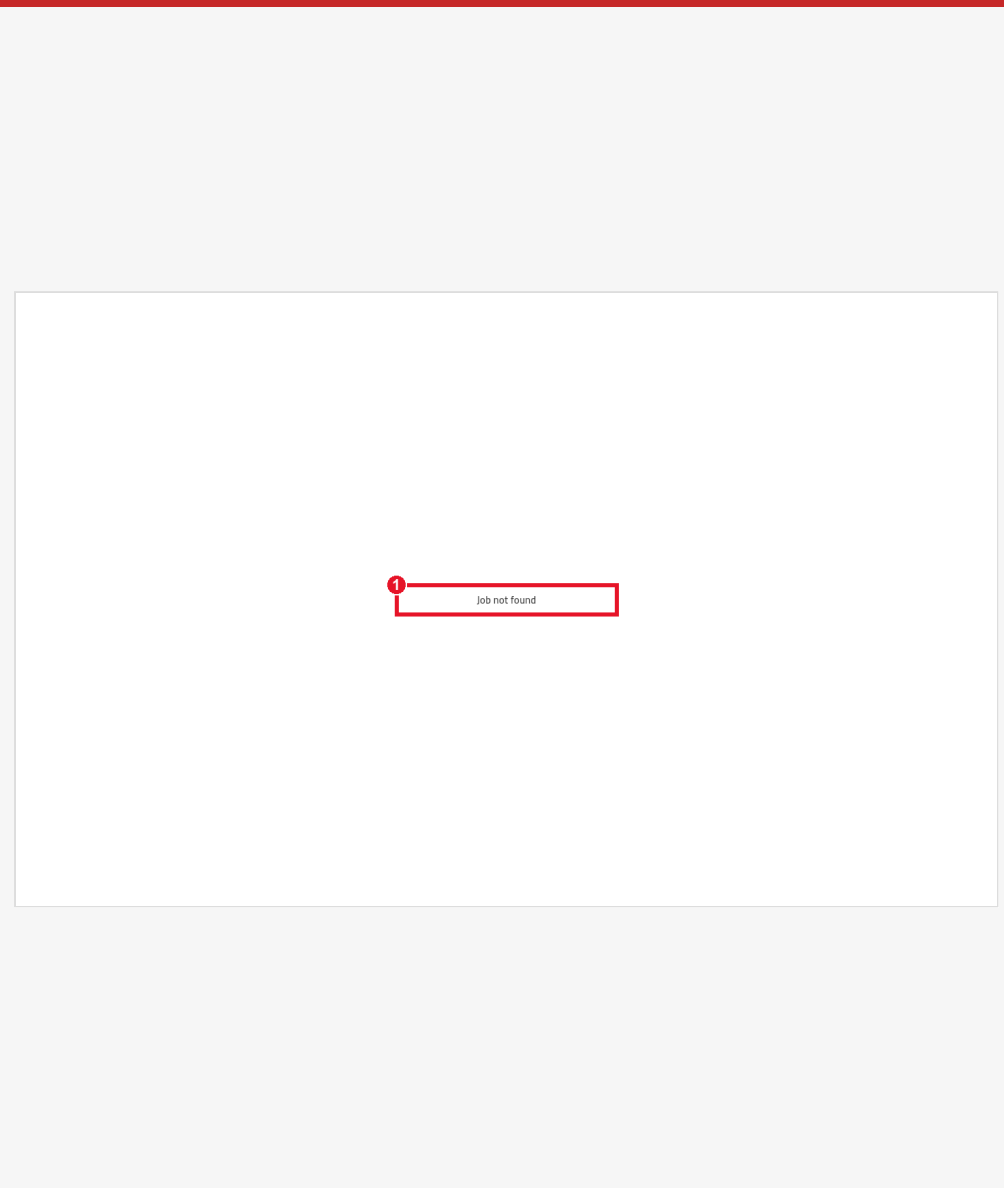

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

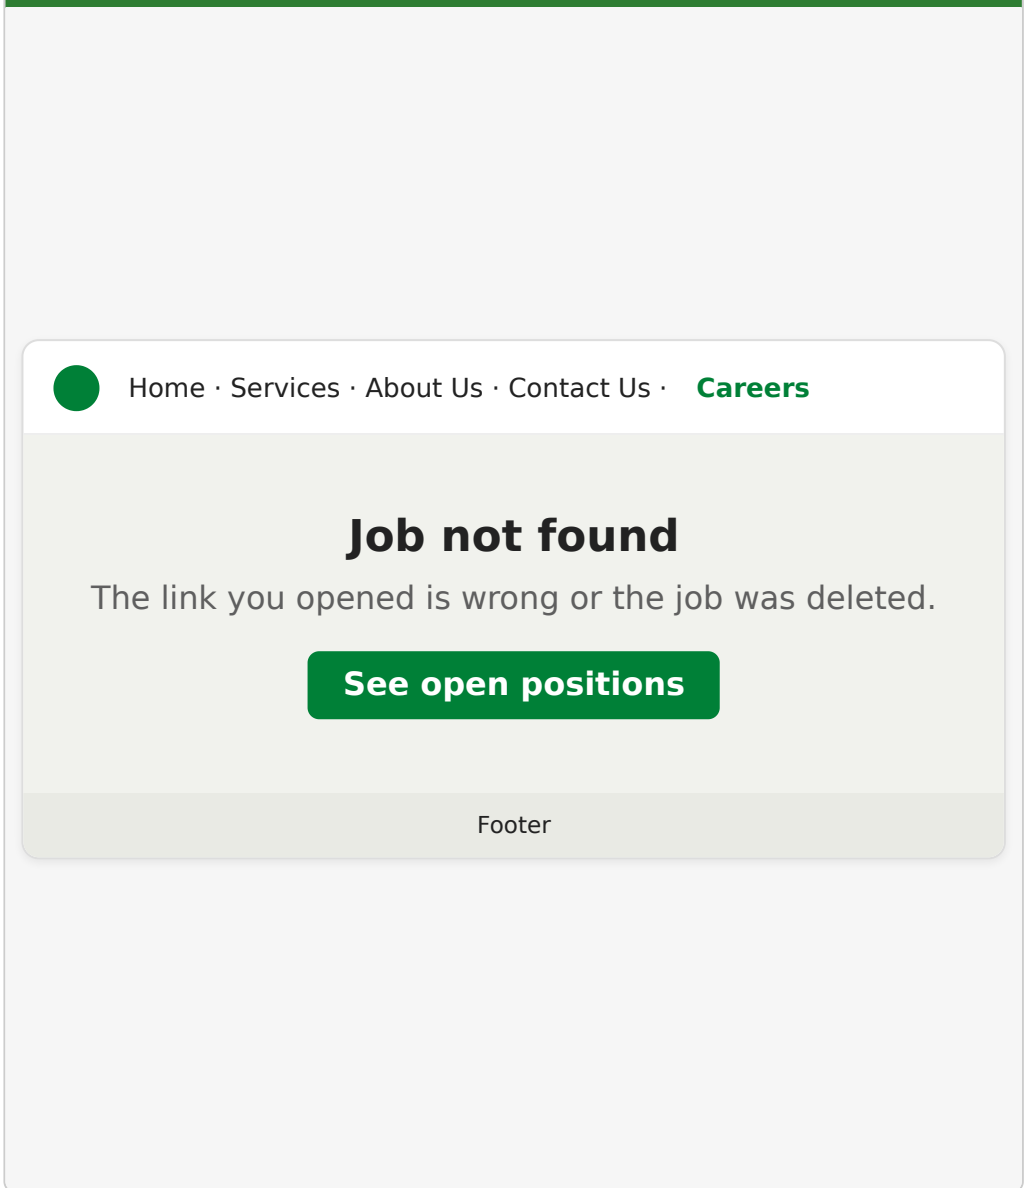

How it was solved: On mobile the footer now shows every link group (two per row), the same as on desktop, with the social icons centred (BUG-140). The links use go() instead of push(), so the address bar updates (BUG-117). Group names come from the CMS, so the real labels may differ from this drawing.

Files: website_app · app_footer.dart, main.dart

BEFORE — QA screenshot (report 06 Oct)

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

How it was solved: An unknown or deleted job id now opens a branded page with the site header and footer, a clear title, and a “See open positions” button. Removed, ended or full jobs show “This job is no longer available” on the same page (BUG-99).

Files: website_app · job_unavailable_view.dart (new), job_detail_page.dart, job_apply_page.dart

BEFORE — QA screenshot (report 06 Oct)

The screenshot shows the Arabic Apply form. The country code field is labeled 'رقم الهاتف *' (Phone Number *). The input field contains '20+' with the flag of Saudi Arabia on the left. The form is titled 'التقديم على وظيفة' (Apply for Job) and 'تواصل معنا' (Contact Us). The form includes fields for name, email, phone number, and address. The phone number field is highlighted with a red border and contains the text '20+'.

BUG-147 - Arabic apply form shows the country code as "20+" with the flag on the left; Contact shows "20"

AFTER — illustration of the fixed screen (drawn from the new code, not a screenshot)

The illustration shows the fixed screen. The country code field is labeled 'رقم الهاتف *' (Phone Number *). The input field contains '+20' with the flag of Saudi Arabia on the left. The form is titled 'التقديم على وظيفة' (Apply for Job) and 'تواصل معنا' (Contact Us). The form includes fields for name, email, phone number, and address. The phone number field is highlighted with a green border and contains the text '+20'.

The code is always written left-to-right, in the same layout as the Contact form.

How it was solved: The country-code box is now always left-to-right, so Arabic pages show “+20” instead of “20+”. The phone field layout is the same as on the Contact page.
