

Bayanatz Website + Jobs Admin — Fixed bugs (QA reports 05-06 Oct 2026)

81 bugs: 19 still open from 05 Oct + 62 new from 06 Oct (BUG-98 → BUG-159). All fixed in code in web_app_admin and website_app. Items marked “Needs deploy” work only after the Cloud Functions, security rules and admin password steps are done.

Still-open bugs — report 05 Oct 2026 (19)

Bug	Module	Problem	How it was fixed
BUG-01	Security — Database	Database could be read without logging in (rules let anyone act as admin).	Admin login now gives a real Firebase sign-in with an admin flag; rules only trust that flag. Visitors see only public jobs; applications, inquiries and admin accounts are admin-only. Needs deploy (functions + rules).
BUG-96	Security — Admin login	Password checked in the browser; hash, salt and default password were inside the website code.	Password is now checked on the server (new adminLogin function), with lock after 5 wrong tries. Default-admin seeding removed; script added to set a new password. Needs deploy + password change.
BUG-14	Website — Contact (OTP)	Sending the code failed with a raw “INTERNAL” error.	Server checks the number and the Twilio settings and returns clear messages; the site shows them in English/Arabic. If it still fails after deploy, the Twilio account/secrets must be checked.
BUG-16	Admin — Web Page CMS	CMS screen cut off on a 390 px phone.	Sub-menu never wider than the screen; its tabs scroll sideways.
BUG-53	Admin — Home CMS	Home preview showed the published text, not the edit.	Edits are passed to the preview; Discard reloads the published version.
BUG-54	Admin — Job Listing	Deleted departments still in the department filter.	Filter lists only departments that exist.
BUG-62	Admin — Careers CMS	After “+ Statistics”, Publish stayed disabled.	Page now rebuilds on every change, so Publish turns on (same fix on Terms and Digital Journey).
BUG-89	Admin — Job Post	Discard closed the form without asking.	“Discard Changes?” dialog (Return To Edit / Discard) when something changed.
BUG-91	Admin — Job Preview	“Save” on the preview saved nothing.	Runs the real save (checks + confirm) and returns to Job Listing.
BUG-46	Admin — All forms	No success message after create / save / delete.	New green “Saved” toast that stays visible while the page closes.
BUG-47	Admin — Job Post	Only one location could be chosen.	Offices from Contact Us plus “Other location...” with free text.
BUG-84	Admin — Dashboard	Score chart said “Poor” for an 80 % candidate.	Uses the same % as the applicant page; empty message when nobody is scored.
BUG-85	Admin — Dashboard	No Candidate Gender chart.	Optional Gender on the public Apply form; donut chart added on the dashboard.
BUG-86	Admin — Departments	Department had no image.	Image upload on Create/Edit; shown on details, department cards and job cards.
BUG-88	Admin — Job Post	A Required Document row could not be removed.	(–) button on each row when there is more than one; empty names highlighted.
BUG-90	Admin — Job Post	No “Save For Later” when editing.	Available in edit mode too — moves the job back to Draft.
BUG-93	Admin — Our Interns	No Time Frame filter.	Time Frame filter by joined date.
BUG-94	Admin — Reads preview	No Desktop / Tablet / Mobile selector.	Device tabs added to the preview.

Bug	Module	Problem	How it was fixed
BUG-97	Admin — Login	“Forgot Password?” did nothing.	Enter e-mail → 1-hour reset link by e-mail → set a new password. Needs functions deploy + SendGrid key.

New bugs — report 06 Oct 2026 (62)

Bug	Module	Problem	How it was fixed
BUG-98	Security — Storage	Files could be listed; applicant CVs downloadable by anyone.	Only admins can list files or open CVs; website images stay public. Needs rules deploy.
BUG-99	Website — Jobs	Removed / ended jobs still opened by direct link.	Hidden by the rules; job and apply pages show “This job is no longer available”.
BUG-100	Admin — Layout	Tablet (820 px) cut off on the right.	Tablets show the full desktop view scaled to the screen.
BUG-101	Admin — Menu	“Job Listing” menu did nothing on detail pages.	Menu closes open pages before moving.
BUG-102	Website — Contact	A fake phone number (e.g. 0000000000) was accepted.	Number checked on the site and the server: “Please enter a valid mobile number”.
BUG-103	Website — Jobs	A Scheduled job was listed before its start date.	Same open/closed rule as the admin; not-started jobs say “Applications open on ...”.
BUG-104	Website — Apply	Same person could apply twice to one job.	One application per e-mail per job: “You have already applied to this job with this email.”
BUG-105	Admin — CMS editors	Discard left without asking (Contact, Reads, Teams, Why Join).	Same “Discard Changes?” dialog on all of them.
BUG-106	Admin — Home CMS	Discard stayed on the edit page.	Discard closes the editor.
BUG-107	Admin — Contact preview	Preview form differed from the live form.	Preview shows the same fields and heading as the live form.
BUG-108	Website — Footer (mobile)	Mobile footer showed one “Vision” link only.	All footer groups shown, two per row.
BUG-109	Website — Jobs	Unknown job link showed bare text.	Branded page with header, footer and “See open positions”.
BUG-110	Website — Job page (AR)	Arabic job page partly in English.	Work type, employment type, level, duration and dates translated.
BUG-111	Website — Job page	Salary shown without currency.	Shows e.g. “10000 - 20000 USD” on job page and apply summary.
BUG-112	Admin — Applicant	Raw Storage links shown; table cut off.	“View CV” / “View Cover Letter” buttons; visible scrollbar.
BUG-113	Website — Job page	Skill chips hard to read.	Light chip style, same as Apply page.
BUG-114	Admin — Applications	Phone shown as “+200000000000”.	Shown as “+20 0000000000” on cards and list.
BUG-115	Admin — Applications	Status / PDF columns could not be reached.	Table scrolls inside the page with a visible scrollbar.
BUG-116	Website — Apply (mobile)	Apply form had 2 columns on a phone.	One field per row under 600 px.
BUG-117	Website — Footer	Footer links kept the old URL in the address bar.	Links now change the URL correctly.
BUG-118	Website — About	Values section showed the Mission text.	Values summary lists the value titles.
BUG-119	Admin — Navigation	Back from Departments / Create Job went to Home.	Real page addresses /jobs/departments and /jobs/new.
BUG-120	Admin — Applications	Location column showed “-”.	Apply form saves the job location; older rows use the job’s location.

Bug	Module	Problem	How it was fixed
BUG-121	Admin — Dashboard	Applications of removed jobs were still counted.	Dashboard ignores them everywhere.
BUG-122	Website — Apply (AR)	Errors in English on the Arabic page.	Error language follows the page language.
BUG-123	Website — Forms	Tab key skipped dropdowns and country code.	Dropdowns reachable by keyboard (Enter/Space, arrows, Esc) with focus ring.
BUG-124	Website — Home (tablet)	Tablet showed 2 of 5 quick links.	All links shown.
BUG-125	Website — Jobs	Empty jobs list showed nothing.	“No open positions right now — check back soon” + Contact link.
BUG-126	Website — Job page	Apply button only at the bottom.	Apply button also next to the title.
BUG-127	Website — Contact	“Arabic” preselected on the English site.	Language defaults to the site language.
BUG-128	Website — Forms	Required fields not marked.	Red * on required labels; “Entity’s Name (Optional)”.
BUG-129	Website + Admin — Forms	“Text Here” placeholders everywhere.	Field-specific hints, darker placeholder colour (site forms + Create Job Post).
BUG-130	Website — Forms	Contact and Apply showed errors differently.	Same error style and one message on both forms.
BUG-131	Website — Forms	Dropdown errors looked different from text fields.	Same red border, text and spacing.
BUG-132	Website — Forms	Phone box sat higher than other fields.	Same label gap and 36 px height as Email.
BUG-133	Website — Forms (tablet)	Phone box 86 px tall on tablet.	Fixed height; country picker max 40 % of the row.
BUG-134	Website — Jobs (mobile)	Titles touched the screen edge.	16 px side margins on Jobs, Job and Apply pages.
BUG-135	Website — Home	Button hover colour unreadable (1.54:1).	Hover = solid brand colour with white text.
BUG-136	Website — Theme	Grey text too light (low contrast).	Darker greys across the site; lighter AR/EN on dark bar.
BUG-137	Website — Services/About/Careers	Dark icons on dark tiles.	Dark tiles changed to a light brand tint.
BUG-138	Website — Accessibility	Icon buttons had no names for screen readers.	Logo, menu and social icons named (e.g. “Open menu”, “LinkedIn”).
BUG-139	Website — Services/Reads	“Read More” rows misaligned.	Cards in a row have equal height; button pinned to the bottom.
BUG-140	Website — Navbar/Footer	Menu and social icons off centre.	Centred.
BUG-141	Website — Job page	Three different left edges.	One inner padding for title, cards and buttons.
BUG-142	Website — Careers	Careers title not aligned with intro.	Title uses the same inset as the text.
BUG-143	Website + Admin	Same pages had different names.	“Terms & Conditions”, “Why Join Our Team”, “Our Team” everywhere.
BUG-144	Website — About (mobile)	“Who Are We?” changed on mobile.	Text shown exactly as typed in the CMS.
BUG-145	Website + Admin	Four different date formats.	One format: “4 Oct 2026” (Arabic in the same order).
BUG-146	Website — Forms	“SEND” / “GET IN TOUCH” in capitals.	“Send”, “Get in Touch”.
BUG-147	Website — Apply (AR)	Phone code shown as “20+”.	Always “+20”, same layout as Contact.
BUG-148	Admin — Lists	Third card column wider than others.	Equal columns (Job Listing, Applications).
BUG-149	Admin — Toolbar	Search box shorter than the buttons.	Search fills the toolbar height.
BUG-150	Admin — Header	“Web Page” item detached in the header.	Same spacing as the other items, also on tablet.

Bug	Module	Problem	How it was fixed
BUG-151	Admin — Charts	Empty charts looked different.	One “No ... yet” style for all charts.
BUG-152	Admin — Inquiries	“New” and “Closed” had the same red.	Closed = dark grey.
BUG-153	Admin — Date filters	Full-screen date pickers with different rules.	One dialog-size range picker (5 years back → today) for Applications, Inquiries and Interns.
BUG-154	Admin — Job details	Section bars 54 px vs 44 px.	Uses the shared section bar.
BUG-155	Admin — CMS	Buttons and tabs had different sizes.	Contact Us buttons 130 × 36 like other tabs; sub-tabs same height.
BUG-156	Admin — Job Post	Required Skills (–) misaligned.	(–) placed between EN and AR fields, only with more than one skill.
BUG-157	Admin — Wording	Wrong / inconsistent labels.	“Remote”, “Secondary Color”, “Total Submissions”, “Cancel”, “Short Description”.
BUG-158	Admin — Main CMS	Font fields had a 10 px inset.	Same inset and text colour as other fields.
BUG-159	Admin — Applications	Application card heading showed the department.	Heading = job title, department underneath.
